This collection of information is required by 37 CFR 1.5. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.11 and 1.14. This collection is estimated to 2 hours to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, P.O. Box 1450, Alexandria, VA 22313-1450. DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

If you need assistance in completing the form, call 1-800-PTO-9199 and select option 2.

Patent
Attorney Docket No. 895,675-267 (formerly 14351-0303)

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

In re the Application of:

CAMPBELL et al.

Serial No.: 09/820,441

Filed: March 28, 2001

For: THERMOGRAPHY CATHETER

Group Art Unit: 3736

Examiner: Huong Q. Nguyen

**COMMUNICATION REGARDING SUPPLEMENTAL INFORMATION DISCLOSURE
STATEMENT**

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

On November 30, 2006, Applicants submitted a Supplemental Information Disclosure Statement and Form SB08 (23 pages) for the above-referenced application. Applicants advised that the foreign and non-patent literature references cited on Form SB08 were not enclosed and noted that Form SB08 may contain duplicate entries.

Enclosed with this submission is an updated SB08 form that does not contain duplicate entries or any references that have already been cited. Copies of the remaining foreign and non-patent literature references are also enclosed.

Applicants note that the Examiner has already initialed the Form SB08 as originally submitted on November 30, 2006, and therefore, Applicants do not ask the Examiner to initial Form

CERTIFICATE OF MAILING (37 C.F.R. §1.8a)

I hereby certify that this paper (along with any referred to as being attached or enclosed) is being deposited with the United States Postal Service on the date shown below with sufficient postage as First Class Mail in an envelope addressed to the Commissioner for Patents, P.O. Box 1450, Alexandria, VA 22313-1450.

SB08 again. Applicants are merely providing the updated Form SB08 for the Examiner's convenience.

Furthermore, Applicants are not enclosing a duplicate Supplemental Information Disclosure Statement; however, Applicants are providing a concise explanation of relevance below for the three references that are in a language other than the English language:

JP2203836 - "TEMPERATURE MEASURING ENDOSCOPE"

To enable the temperature measurement at low cost without losing flexibility of the inserting part of an endoscope by dividing an infrared image within a temperature measuring target range into plural lines, and successively scanning the infrared rays every line, which infrared rays are then entered into an infrared fiber array, successively transmitted by the infrared fiber array, visibly converted, restored into one image, and displayed. CONSTITUTION: An infrared image scanning means 3 for dividing a temperature measuring target range into plural lines and successively scanning the infrared rays in each line on the incident end surface 2b of an infrared fiber array to form images is provided on the top end 1a of the inserting part 1 of an endoscope. An infrared display means 4 visibly converts the infrared images successively transmitted by the infrared fiber array 2, which are restored into one image and displayed. An infrared ray detector 41 has ten elements in total disposed in such a manner that one element corresponds to one infrared fiber 2a. Small pieces of the infrared image transmitted by the infrared fiber array 2 are converted into the original one infrared image, or the temperature distribution, which is then converted into a signal showing the change of visible colors, and the temperature distribution within the temperature measuring target range is indicated on a display 43 as the difference in colors.

JP5177001 - "EXPANDING CATHETER"

To improve an air cleaning cartridge having an insert member so as to have a satisfactory thermal distribution in the circumferential direction and sufficient vibration resistance and impact

resistance, and manufacturable at a low cost. CONSTITUTION: In the air cleaning cartridge 1 for an inhaler which has a filler chemical for binding carbon dioxide and an insert member 3 having a plurality of leg pieces 6 radially arranged vertically to the passing direction and turned in the direction of a cartridge wall 2, the leg pieces being formed so as to divide the filler chemical 4 into individual chemical strands 5 with the center of the air cleaning cartridge 1 as the start point, the leg pieces 6 have flexibility for compensating the different degrees of filling of the chemical strands 5, and each leg piece is bendingly formed into a uniform zigzag.

JP3032394 - "SHIT AND URINATION DETECTING DEVICE"

Although the only translation available to Applicants appears to quite literal, and in some respects crude, the translation reads: "A comparator 12 compare each of temperatures measured sensors 3 and 5 with a reference temperature measured by sensor 5 to detect shit or urination. And when the shit or urination is detected, as alarm sound is generated."

The Commissioner is hereby authorized to charge Deposit Account No. **50-2862** for any fees that may be required with this submission.

Respectfully submitted,

O'MELVENY & MYERS LLP
